

## Green Johanna

**Capacity:** 330litres

**Size:** (height) 950mm, (diameter) 900mm

**Price:** Usually between £100 and £150

**Summary:** A sturdy bin comprising a base and tiered layers that are screwed together. Reaches higher temperatures than a standard cool bin allowing for cooked waste to be broken down as well as garden waste.

### Further Info:

- Grass clippings, leaves, twigs, weeds, bark etc. can also be composted, but recommended to cut the waste into small pieces
- Do not add animal faeces
- Mix and aerate the uppermost layer of the compost every time you add new material and occasionally aerate the lower compost using the stirring stick
- Depending on the conditions, the compost will be ready after four to six months
- Empty by removing the compost through the two doors at the base
- Screwed together components reduce the vermin risk

**Available from:** [getcomposting.com](http://getcomposting.com) (sometimes subsidised), [greatgreensystems.com](http://greatgreensystems.com), garden centres

As the UK's leading organic growing charity we encourage and inspire people to grow the organic and sustainable way, working together to protect our natural heritage. Find out more at [www.gardenorganic.org.uk](http://www.gardenorganic.org.uk)
